

INTRODUCING THE

Trust the world's biggest to deliver the best.

With a history spanning 55 years, you can count on SunEdison to deliver the very best in solar panels for Australian conditions.

Quality assured for peace of mind

- Backed by SunEdison (NYSE: SUNE)
- SunEdison testing well above IEC standards, including PID, thermal cycling, mechanical loading
- Potential Induced Degradation (PID) tested to 85/85 for 300 hours
- IEC 61215 certified
- Manufactured in a brand new factory with cutting edge equipment and full statistical process control
- 100% operation, performance testing and thermal imaging of each cell prior to assembly
- Backed by a generous 25-year linear power warranty

Efficient, reliable, robust

- Bus bars and fingers printed separately, not simultaneously, for both reduced surface area and reduced electrical resistance
- Outstanding module power of 265W and efficiency of 16.2%

 - CEC founding signatory
- \$15B USD market capitalisation (June 2015)

Savings: SunEdison does not guarantee any savings, that any savings will be realised immediately after completion of system installation or that there are no costs (up-front or otherwise) associated with participation in the SunEdison Energy Plan. Any savings would be subject to meter change over having occurred in relation to the solar system and subject to the terms of the customer's Solar Rental Agreement. \$0 upfront: Meter change over costs and other third party costs may apply. Insurance: Insurance may not cover all losses and damages. Certain exclusions apply, details of which are in the customer's Solar Rental Agreement. Performance guarantee: Subject to the terms of the customer's Solar Rental Agreement. SunEdison's monitoring responsibilities: Subject to the terms of the customer's Solar Rental Agreement.
